

### **Intro to Digital Media Assignment #3**

Photo Manipulation/Retouching

Due: Wednesday, October 1st, before quiz

**W**ith this assignment, you will be responsible for altering 3 different photographs (in three different ways) to achieve effects that were not otherwise there. We will be going over several possible examples in class. You may choose to make your photos appear “vintage”, to add fog or rain, to use airbrushing techniques to make your subject look better, or simply to restore an old photo, using the healing brush, clone stamp, ect. Bring in all three photographs Monday, September 29, with ideas and sketches; you should probably get started before Monday; come into the lab this week/weekend and practice your photoshopping. Check out my delicious links for tutorials and ideas; we will also go over some methods in class. Please use your own photos for this project; bring digital camera files, negatives, or prints to scan. NO internet photographs this time around.
